

Team Members:

- Owen Smith: osmith-CU
- Jingqi Liu(JanesyLiu): [jili3523](#)
- Mathew Kim: maki9472
- Patrick Taylor: pata0278
- John Hodgen: joh08797

What features were completed?

- The home page
- HTML layout for quiz system
- Name search Architecture

What worked during the demo?

- The home page and the link to the other pages were all functional during the demo

What issues were faced either during the development or during the demo?

- Getting the group members altogether and working out a complete, concise schedule
- Organization methods could use some overall improvement.
- Ran into several problems with CSS on the homepage but worked out of most of them

What were the suggestions offered by the TA?

- Make multiple Jira Sprints
- Plan out individual tasks better

Individual contributions by each team member

- Owen Smith:
 - Wrote HTML and CSS for home page and quiz system
 - Will work on refining CSS for quiz system and test scripts for manipulating quiz system appearance.
- Jingqi Liu:
 - Follow up with the Jira board page and team web page program.
 - Will work on the testing session and report and help to fix any issue occurring on the database or web pages. Problem will be checked as well.
- Mathew Kim:
 - Set up the Jira Roadmap and Github Repository, worked on the overall organization of the team, and turned in all current Milestone Objectives to repo
 - Will work on the “About Us,” and the “Resources” page for the website this week
- Patrick Taylor:
 - Worked on name searching code, planning out big data structures
 - Will work on the back end structure in the future

- John Hodgen:
 - Drafted and helped finalize questions for the name generator quiz, as well as doing planning/research for optimizing the name-bank data structure
 - Will work on a contact page with the team names/contact info as well as website aesthetic
